MASTER

Speed is Creativity.

Musicians often lose their best ideas while fumbling with complex menus. HandyRec is built on a simple philosophy: Don't take your hands off the instrument.

Control the entire recording process using intuitive keyboard shortcuts designed for flow, not friction.

A true multiplatform experience for the modern studio.

The Interface at a Glance.

A clean, distraction-free layout containing everything you need and nothing you don't.

Transport & Basic Control.

The mouse is the enemy of flow. Keep your hands on the keyboard.

A dark grey rectangular button with rounded corners and a glowing orange border. The word "Space" is written in orange text in the center.

Space

Play / Pause - Instantly review your take.

A dark grey rectangular button with rounded corners and a glowing orange border. The word "Ctrl" is written in orange text in the center.

Ctrl

A dark grey rectangular button with rounded corners and a glowing orange border. The word "Space" is written in orange text in the center.

Space

Record - Start capturing audio on all armed tracks immediately.

Stop - Stopping is done via the Mouse button (safety feature to prevent accidental stops during a live take).

Track Management & Mixing.

- **Fader** (Volume)
- **Pan** (L/R Stereo)
- **Meter** (Signal Level)

Keyboard Shortcuts

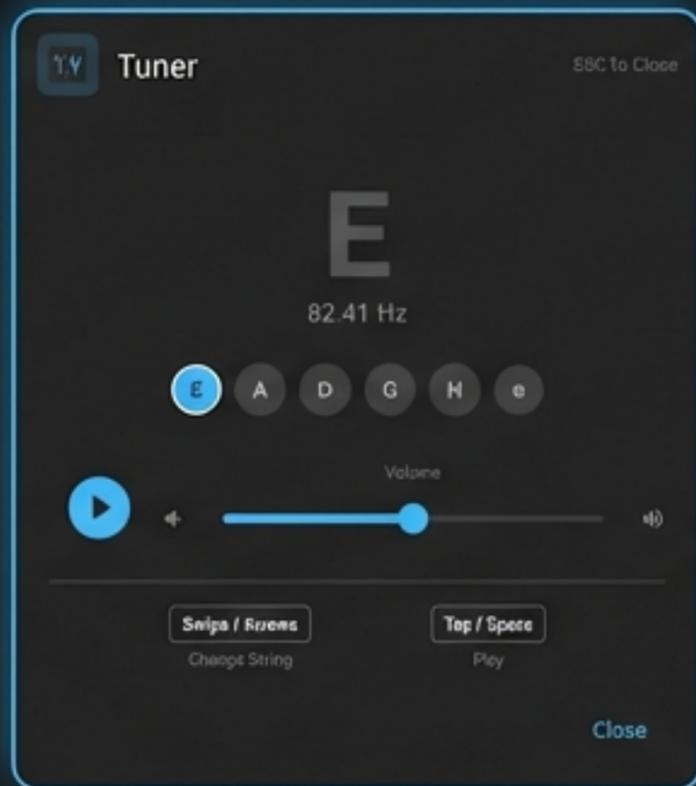

- Ctrl** + **1-8** **Arm Track** (Toggle Record/Red Light)
- Alt** + **1-8** **Mute** (Silence Track)
- Alt** + **1-8** **Solo** (Hear only this Track)
- Ctrl** + **Alt** + **1-8** **Clear Track** (Delete content)

The Professional Metronome.

Rock-solid timing powered by a high-precision audio engine.

Essential Musical Utilities.

Chromatic Tuner [Shortcut: T] Inter Bold, HandyRec Orange

- Visual pitch feedback
- Reference tone via [Space]
- Change target string via [Tab]

Auto-BPM [Shortcut: A] Inter Bold, HandyRec Orange

- Analyzes audio on Track 1
- Automatically sets project metronome

Latency Calibration. HandyRec Orange.

Perfect synchronization, automatically calibrated.

- **The Problem:** System audio latency can cause recorded tracks to drift out of time.
- **The Solution:** The Calibration Loopback test.
- **The Process:**
 1. Go to Settings -> Latency Compensation.
 2. Unplug headphones & set speakers to Max Volume.
 3. Ensure silence in the room.
 4. Click Calibrate. The app listens to its own 'beep' and adjusts the offset automatically.

Calibration

1. Unplug headphones.
2. Set volume to MAX.
3. Ensure silence in the room.

The app will play a click and listen for it.
